

Security and intellectual property protection

are key priorities and concerns at Enfoglobe. Our clients include companies and organizations with sensitive proprietary information. We enforce policies and procedures to protect our clients' information and IP assets. Enfoglobe security includes the following: NDA agreements signed by all personnel; secure servers with multiple levels of backups for all client data; documented security and recovery processes; experienced administrators; and data security specialists.

We use Agile

development methodology, SCRUM process, and Test Driven Development along with continuous integration environments.

Enfoglobe's happy clients

include companies, municipalities, and regional and national government agencies in Europe and in the USA. Our developers can work at your business's physical site or from Enfoglobe's offices in Florida and Poland. Additional Enfoglobe offices are opening in Lvov, Ukraine and Grodno, Belarus.

We honor long-term

resource commitments for projects. Enfoglobe takes care of travel arrangements for work in the USA.
